- 02 - Second and Third-level Support
- 03 - Client Operation

## **Cloud Solutions**

---

- 01- Advanced Cloud Solutions
- 02 - Cloud Operations
- 03 - Cloud Advisory
- 04 - Crisis Management

# SUCCESS STORY 1: Server Consolidation

**Challenge:** One of our clients experienced rapid server growth outpacing their business volume. This proliferation led to inefficient resource use and higher costs.

## Solution

We conducted a comprehensive review with business stakeholders.

Our goal was to optimize the IT infrastructure and eliminate unnecessary servers.

## Results

We were able to consolidate 30% of the servers, which led to a significant optimisation of the IT infrastructure.

As a result, we realised cost savings of around 20%, which not only increased efficiency but also brought significant financial benefits for the company.

# SUCCESS STORY 2: O365 Migration Project

**Challenge:** Transitioning from an on-premise Microsoft environment, requiring comprehensive local support and management to a cloud-based O365 environment.

## Solution

DAM Invisible Technology served as the main local technical advisor and project manager for the corporation's group-level project.

## Support Provided

**Local Project Management:** Managed the transition process at a local level.

**Desktop Environment Preparation:** Prepared the local on-premise desktop and management environments for the transition.

**User Support:** Assisted business users with the transformation to the O365 cloud environment, including:

- Migration of local file server content to the cloud.
- Conversion of local files, such as cross-referenced XLS files.
- Conversion of mailing groups to cloud-based solutions.
- Transition of applications with on-premise Microsoft connections (e.g., local mail sending and receiving) to O365 cloud solutions.

## Result

Seamlessly transitioned the local environments to the Microsoft O365 cloud, ensuring minimal disruption and enhanced cloud capabilities.

# SUCCESS STORY 3: Microsoft Marketplace Listing

Many customers faced difficulty finding reliable Linux reseller partners for open-source to cloud migration services.

DAM Invisible Technology leveraged their extensive expertise by becoming officially listed on the [Microsoft Marketplace](#).

This listing highlights our proficiency in migrating open-source environments to the cloud.

## Our Expertise

### Migrations to Microsoft 365/Office 365:

- Email: Sogo to Microsoft 365
- Collaboration: Nextcloud to SharePoint/OneDrive
- Cloud Platforms: AWS/Private Cloud to Azure, Google Workspace to Microsoft 365

### Platform Migrations:

- From On-Premise to Hybrid/Native Cloud
- On-Premise to Azure IaaS, SaaS, PaaS

### Security:

- Intune (MDM): Implementation and customization
- BYOD: Management with Intune
- Microsoft 365 Security Solutions: EMS E3/E5, MFA, 2FA
